Isharah-Selfie Dataset
Data Use Agreement

King Fahd University of Petroleum & Minerals (KFUPM) · Dataset:
huggingface.co/datasets/GufranSabri/isharah-selfi

Please read carefully. Isharah-Selfie contains video recordings of real, identifiable people, including their faces, hands, upper bodies, voices (if any), and in some cases personal surroundings. All signers gave informed consent on the condition that the data be used **only for non-commercial research** and never in ways that could identify, expose, profile, or harm them. Access is granted only to those who sign this agreement.

1. Definitions

- **"Dataset"** means the Isharah-Selfie Saudi Sign Language dataset, including all videos, frames, gloss and Arabic text annotations, metadata, split files, and any portion, derivative, or extract of them.
- **"Licensor"** means the dataset authors and King Fahd University of Petroleum & Minerals (KFUPM).
- **"Recipient"** means the individual signing below and, where applicable, the institution on whose behalf they sign.
- **"Research Purpose"** means non-commercial academic or scientific investigation, such as sign language recognition, translation, and related accessibility research, whose results are intended for publication or public scientific benefit.
- **"Subjects"** means the signers and any other person who appears in the Dataset.

2. Grant of Access

The Licensor grants the Recipient a limited, non-exclusive, non-transferable, non-sublicensable, revocable licence to access and use the Dataset solely for a Research Purpose and subject to this Agreement. No ownership rights are transferred. All rights not expressly granted are reserved.

3. Permitted Uses

- Training, validating, and evaluating machine-learning models for sign language recognition, translation, and closely related accessibility research.
- Reproducing and comparing against published benchmarks using the official splits.
- Extracting features such as pose or hand keypoints and embeddings for the above purposes, provided they cannot be used to reconstruct or identify a Subject.
- Publishing research results, including model performance and aggregate statistics.

4. Prohibited Uses

The Recipient shall **not**, and shall not allow others to, use the Dataset or anything derived from it to:

- **Identify or re-identify Subjects**, by face recognition, biometric matching, linking to other datasets, social media, public records, or any other means, or attempt to determine a Subject's name, location, employer, health, or other personal details.
- **Perform biometric analysis or profiling** of any person, including face, voice, gait, or hand-geometry recognition, emotion, age, gender, ethnicity, health, or disability inference, or surveillance of any kind.
- **Violate privacy or dignity**: doxxing, harassment, stalking, discrimination, blackmail, defamation, ridicule, or any use that could cause a Subject distress or reputational, financial, or physical harm.
- **Create deceptive media**, such as deepfakes, face or body swaps, voice or likeness synthesis, avatars that resemble a Subject, or any content that falsely depicts a Subject saying or doing something.

- **Use for commercial purposes**, including training, fine-tuning, or improving any product, service, or model offered for sale, subscription, advertising, or other commercial benefit, or any use by or for a for-profit entity outside genuine non-commercial research.
- **Deploy in high-stakes systems** (e.g., medical, legal, immigration, law-enforcement, employment, or emergency-response decisions) without separate, rigorous validation and appropriate human oversight.
- **Redistribute or publish** the Dataset, or any video, frame, or image of a Subject, in whole or in part, in any form, including by hosting it publicly or sharing mirrors, torrents, or download links.
- **Circumvent** access controls, or attempt to remove, blur-reverse, or de-anonymise any protection applied to the Dataset.

5. Privacy and Data Protection

- The Recipient acknowledges that the Dataset contains personal data and sensitive content, and shall handle it in accordance with all applicable data-protection and privacy laws (including, as relevant, the Saudi Personal Data Protection Law and the GDPR) and the Recipient's institutional ethics requirements.
- The Dataset shall be stored on secure, access-controlled systems and shared only with team members who have been named in this Agreement or have signed their own copy.
- The Recipient shall not copy the Dataset to personal devices, public cloud buckets, or any location accessible to unauthorised persons.
- Any research outputs must not allow a Subject to be recognised. Figures, demos, and videos shown in papers, slides, or online **must not reproduce a Subject's face or identifiable features** unless the Licensor has given prior written permission; use keypoints, skeletons, or anonymised illustrations instead.
- The Recipient shall promptly notify the Licensor (within 72 hours of becoming aware) of any unauthorised access, loss, or disclosure of the Dataset.
- If a Subject withdraws consent, the Licensor may ask the Recipient to delete the relevant data. The Recipient shall comply within 14 days.

6. Redistribution and Derivatives

- Trained models and weights may be shared only if they do not contain, and cannot reasonably be used to regenerate, identifiable Subject data.
- Annotations, split files, and benchmark results may be shared in publications; raw videos and frames may not.
- Any derived dataset containing Subject imagery is covered by this Agreement and must not be released without the Licensor's written consent.
- Other researchers must obtain access directly from the Licensor by signing their own agreement.

7. Attribution

Any publication, presentation, or software that uses the Dataset must cite the Isharah-Selfie paper (BibTeX available on the project page) and acknowledge the Dataset. The Recipient is encouraged to share a copy of resulting publications with the Licensor.

8. Ethical Conduct

The Recipient shall use the Dataset in an ethical, respectful, and responsible manner, with particular regard to the Deaf and hard-of-hearing community and the dignity of every Subject. The Recipient shall obtain any ethics-board or institutional approval required for their research.

9. No Warranty and Limitation of Liability

The Dataset is provided "as is" without warranties of any kind, express or implied, including accuracy, completeness, or fitness for a particular purpose. The Licensor shall not be liable for any damages arising from use of the Dataset. The Recipient is solely responsible for its use and shall indemnify the Licensor against any claims arising from the Recipient's breach of this Agreement.

10. Term, Termination and Breach

- This Agreement takes effect on signature and remains in force until terminated.
- The Licensor may revoke access at any time, with or without cause. The Recipient may terminate at any time by written notice.
- On termination, the Recipient shall delete all copies of the Dataset (including backups and derived data containing Subject imagery) within 14 days and confirm in writing on request.
- Breach of this Agreement automatically terminates the licence. The Licensor may report violations to the Recipient's institution, publishers, and relevant authorities, and may seek legal remedies. Obligations on privacy, prohibited uses, and redistribution survive termination.

11. General

This Agreement is the entire understanding between the parties on its subject. It may not be assigned by the Recipient. If any provision is unenforceable, the remainder stays in force. This Agreement is governed by the laws of the Kingdom of Saudi Arabia, and disputes fall under the jurisdiction of its competent courts.

Acknowledgement and Signature

By signing below, I confirm that I have read, understood, and agree to be bound by the Isharah-Selfie Data Use Agreement. I am authorised to sign on behalf of myself and, where indicated, my institution. I will not attempt to identify any person in the Dataset and will use it for non-commercial research only.

A. Recipient

Full name _____

Position / title _____

Institution / organisation _____

Country _____

Official email _____

B. Intended research

Briefly describe the research project and how the Dataset will be used (3–5 lines).

_____

_____

_____

C. Additional team members who will access the Dataset (each must also sign)

_____

_____

D. Declarations (tick all)

[ ] I will use the Dataset for non-commercial research only.

[ ] I will not identify, profile, or track any person in the Dataset, nor create deceptive media of them.

[ ] I will not redistribute the Dataset or publish identifiable footage of Subjects.

[ ] I will store the Dataset securely and delete it on termination or on request.

[ ] I have, or will obtain, any institutional ethics approval required for my work.

Signature _____ **Date** _____

Printed name _____ **Place** _____

Institutional representative (if required by your institution)

Name / title _____ **Sign & date** _____

How to submit. Sign this form, scan it, and email the PDF from your institutional address to **hluqman@kfupm.edu.sa** with the subject “Isharah-Selfie access request”. Once approved, you will be granted access to the dataset on Hugging Face (huggingface.co/datasets/GufranSabri/isharah-selfi). Requests from personal or non-institutional email addresses may be declined.
